SOLAR ACCESS

— Affordable Home Heating —

Solar Access is a new Massachusetts program for middle-income homeowners. The non-profit Center for EcoTechnology (CET) is **bringing affordable, renewable, energy to your community.**

Working with one of CET's energy experts, you will be guided through the program which combines utility, state, and federal incentives for renewable energy. **You will pay less than you spend now.**

What you get:

- Massachusetts Clean Energy Center incentives
- An energy efficient heating and cooling system
- Energy independence
- Ownership of solar panels and a heat pump
- Guaranteed energy savings
- An expert to guide you through the program every step of the way
